

QUESTION:

Implement a Sign Up and Login functionality on the ReactJS Frontend.

(form validation)

Project Type – typescript project

CSS – Tailwind

Mobile Responsive

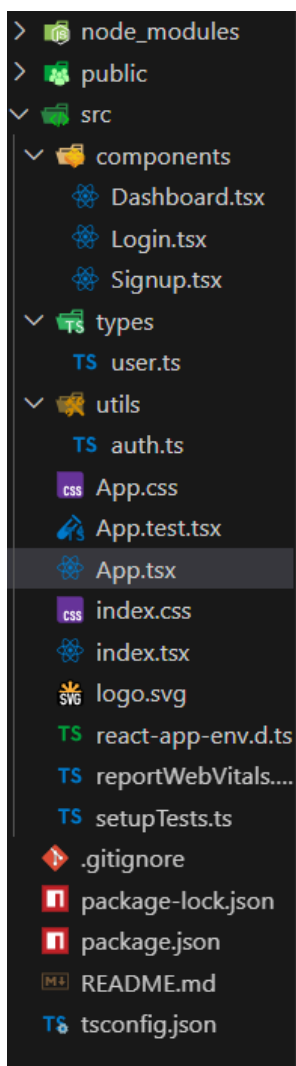

Dashboard Module – Lazy Load

Use Local Storage and Session Storage to manage user data and authentication state.

After a successful login, redirect the user to the Dashboard page.

On the Dashboard, display a User Listing showing all registered users.

OUTPUT:

Sign Up

Sign Up

Login

Login

Dashboard

Logout

Registered Users:
